

Abstract of the Disclosure

A dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club, with this trainer being intended to teach full swing positioning to a golfer. This trainer is constructed of rigid material and configured to have a shaft with a handle portion adapted to be grasped by the golfer so that the golfer can swing the trainer in the general manner of a golf club. The club shaft extends past the handle portion in a direction away from the club head and forms a generally U-shaped portion. This latter portion is disposed at an angle to the shaft, so that when the golfer is grasping the handle portion, a part of the U-shaped portion may rest against the leading forearm of the golfer, or directly above the leading forearm, thus to assure proper wrist action, and proper club face presentation.
